CUSTOMS CLEARANCE SERVICES

# Logistics Services

# Micropicking expertise

**We handle even your smallest item!**

Let the experts handle all your supply chain activities more efficiently and be a key solution for your e-business. Thanks to our micro picking logistics expertise, Logika offers added value services such as express micropicking & customized packaging for all your e-orders.

A black and white photograph of a warehouse worker in a white uniform and cap, focused on a task. The worker is positioned in the background, slightly out of focus. In the foreground, a large, dark-colored box is prominently displayed. The box has the words "micro picking" printed on it in a light, sans-serif font. The box is open, and a small, clear plastic container is visible inside. The overall scene is set in a warehouse environment with industrial shelving and equipment visible in the background. The lighting is bright, creating a professional and efficient atmosphere.

# e-Shop logistics outsourcing

The key to success is to focus on your sales and not your supply chain.

In a world that is becoming more connected and complex, outsourcing saves time & money, thus it is a global trend in the e-commerce industry. The rapid growth of e-commerce is driving deep changes in logistics and transport management.

Logika takes a professional look at the conditions and coordinates all factors relevant to you and your customers.

# Cosmetics & pharma

Logika provides wholesale and retail distribution of Cosmetics, OTC and Health products, offering specialized micro picking based on Expiration dates and LOT numbers as well as customized packing services to the required specifications

# Fashion logistics

Logika implements supply chain solutions tailored to the complexities and changing requirements of the fashion logistics. We closely follow fashion, luxury goods and the textile industry. We currently provide logistics and transport services in key segments as diverse as footwear, garments, hanging garments and fashion accessories. You can rely on Logika's high quality services, dedicated fleet and network of specialised partners to boost your business.

# Retail logistics

If your business is faced with making committed deliveries to your customers across the country,

Logika manages the order fulfilment and the last mile distribution with consistency, according to your requirements.

# Logistics on high value products

High value products are characterized by major peculiarities and needs.

The Supply Chain of these products is a critical factor in maintaining or even increasing sales as they are high value products where every wrong choice costs.

## Last mile execution

No matter how big or small a package, we consider on - time delivery to be our core competence and we constantly aim to push your business further.

Last mile delivery is a critical part of online shopping and represents one of the most important and challenging issues.

Get it wrong, and you risk alienating consumers; get it right, and you may just gain a customer for life.

Logika is taking care of a cost-effective last mile delivery that provides high quality service for its customers.

# Logika's fleet

In order for Logika to make road transport process more efficient and to make operations more flexible, a fleet consisted of 45 trucks is at your disposal covering Attica.

Furthermore, Logika has its own direct line from our premises to SKG as well as strategic partnerships in order to serve your deliveries all around Greece.

## Tailor reverse logistics solution

Through a series of processes, Logika undertakes the reverse flow of goods through the supply chain.

By channelling "dead stock" back into the market, our clients regain the lost market value of the product

# Freight forwarding services

# Road Freight Transports

Logika can cover your road freight needs through our established routes with swift, transparent and reliable service.

On time and on budget.

We can support even the most specialized requests via dedicated trucks or Express Transport service.

Weekly Groupage and FTL Exports  
And of course, we are ADR friendly.  
Our specialized customer service personnel will receive your request and swiftly revert with your customized quote.

Upon assigning of your cargo, our experienced operations team will provide accurate updates and reliable pickup and delivery information.

## Offices in SKG

Logika has a strong and newly established office in Thessaloniki area providing international road freight & cross docking services.

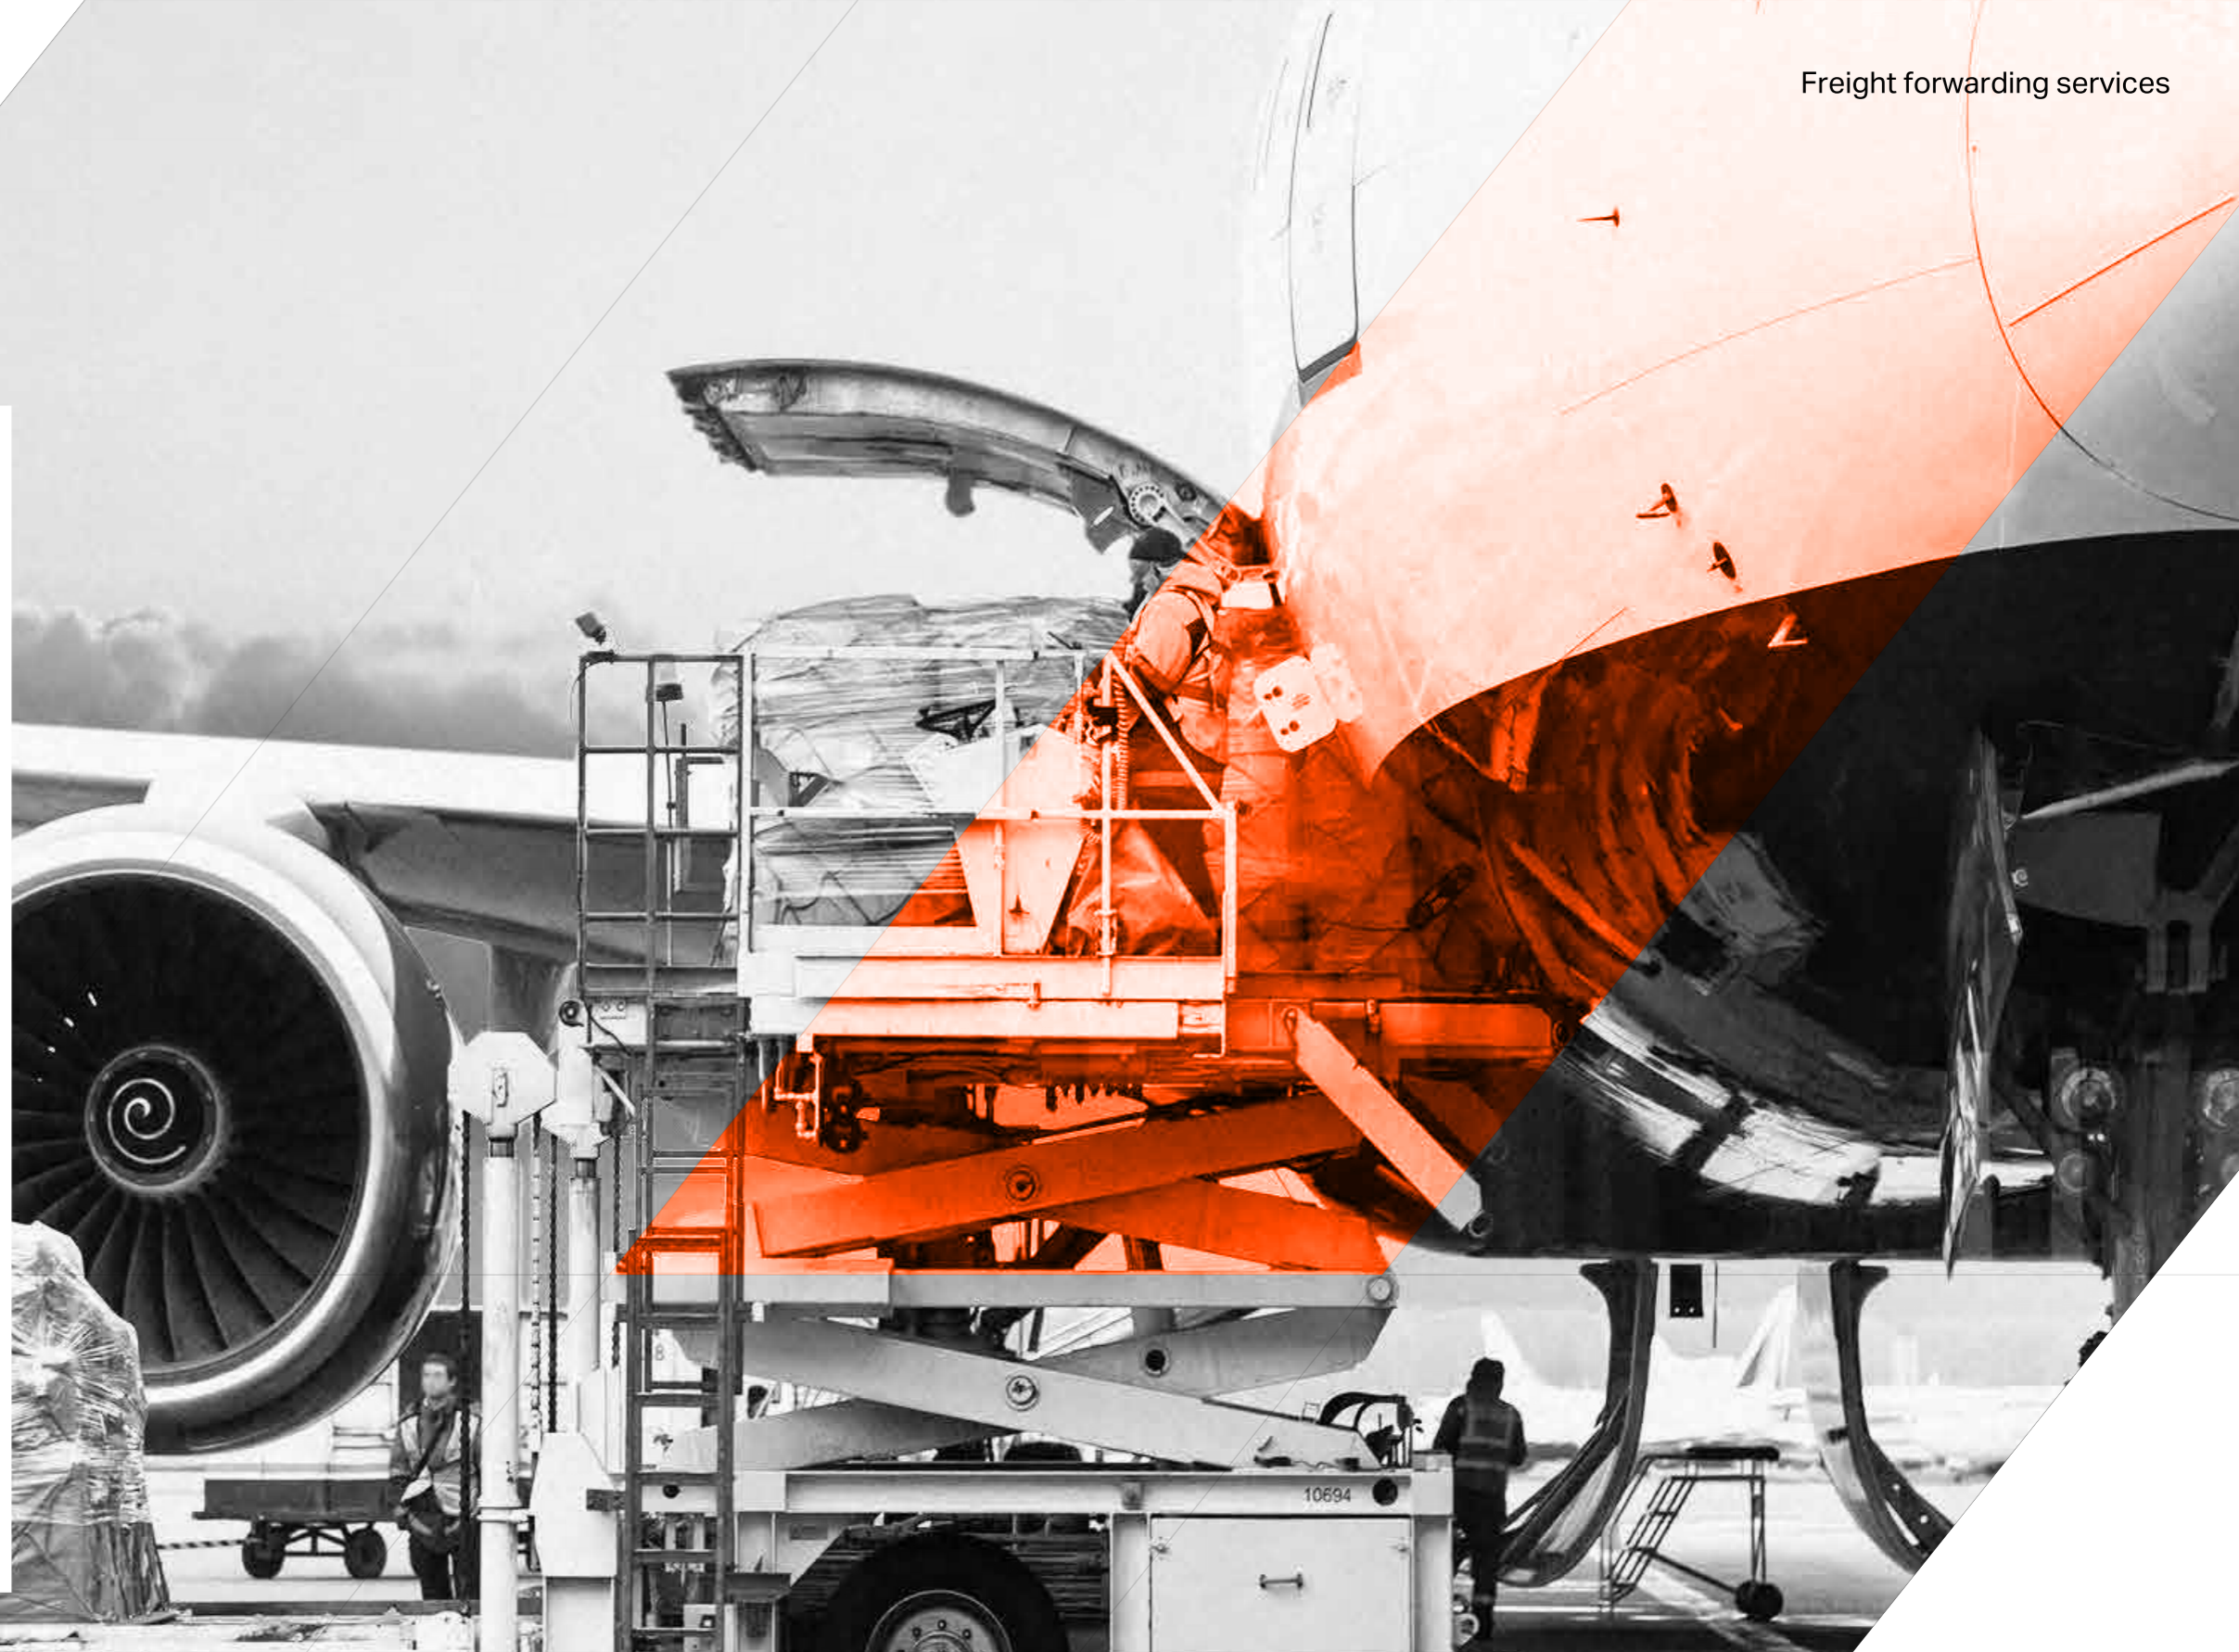

# Air Freight Department

The Air Freight division, located at El.Venizelos airport area, offers very competitive air freight rates and handles your enquiries with ease.

The air traffic department provides an integral transport service, including collection at source, airport transfer, customs clearance, customized packaging & cargo insurance.

- IATA Accredited Agent, IATA Dangerous Goods Certificates.
- Worldwide Coverage by Strong Networks
- Temperature Control Shipments (Perishable Goods & Pharmaceuticals).
- Dedicated Aviation Parts Transportation (Aircraft on Ground) under 24/7 operations
- Customs Clearance Procedures - Triangle Shipments.
- Long Lasting Relationships with external partners meeting our cooperation standards

# Sea Freight Transports

Logika provides fully reliable, customizable and cost effective international container shipping services for your shipments all around the world.

We are a leading player for your FCL & LCL cargoes through our long-term partnerships with worldwide network of agents.

Based on our shipping volumes, Logika is in a position to offer competitive prices and superior services to your business.

# Bulk logistics division

Logika has the know-how in bulk liquid transport. A knowledge combined with a customer oriented mentality defines the service levels that we provide.

- Chemical supply chain specialization
- Quality controlled management
- Special services
- Competitive rates
- Long-term cooperation directly with major ocean carriers

## logika Tank container operations

Logika is here to evaluate if you should transport your goods in tank containers or other packaging units.

Compared with drums, a tank container can be up to 40% lower in cost on a door-to-door shipment, for example. While for non-hazardous liquids flexitanks may be a good alternative.

## Flexitank container operations

- Very low installation cost process will reduce loading / unloading time

- Efficient and also cheaper than the tank

- No export load required

## Safety

Reliability-operability-stacking capability

ISO tank containers are built to meet ISO standards making it suitable for different modes of transportation, and built to carry hazardous cargo

## Sales

Our sales team strives to develop and maintain customer relationships by:

- Providing competitive rates
- Maintaining customer accounts
- Keeping rates within the fluctuation of the tank container market
- Logistically outlining the most appropriate shipping lines

# Professional services

# Technology

# Logika pricing system

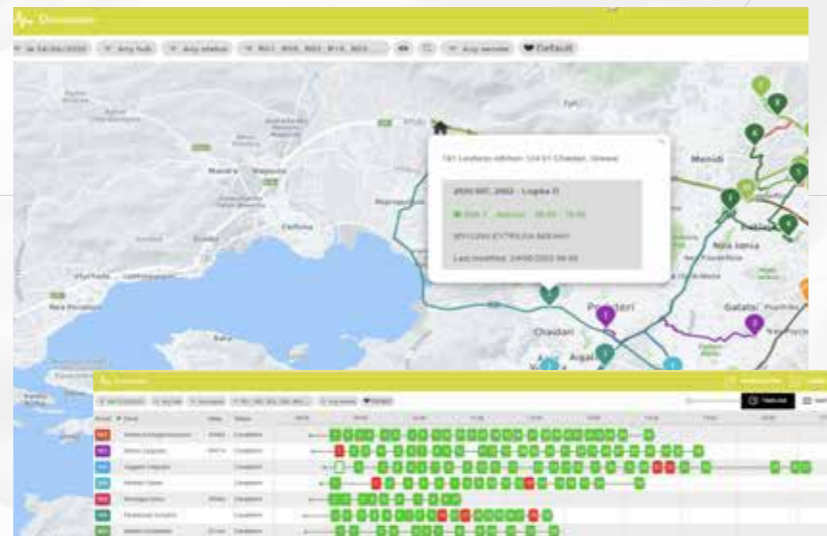

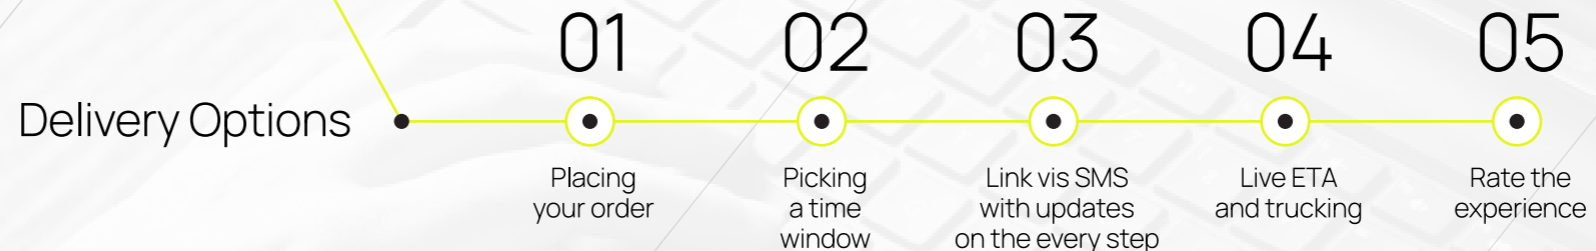

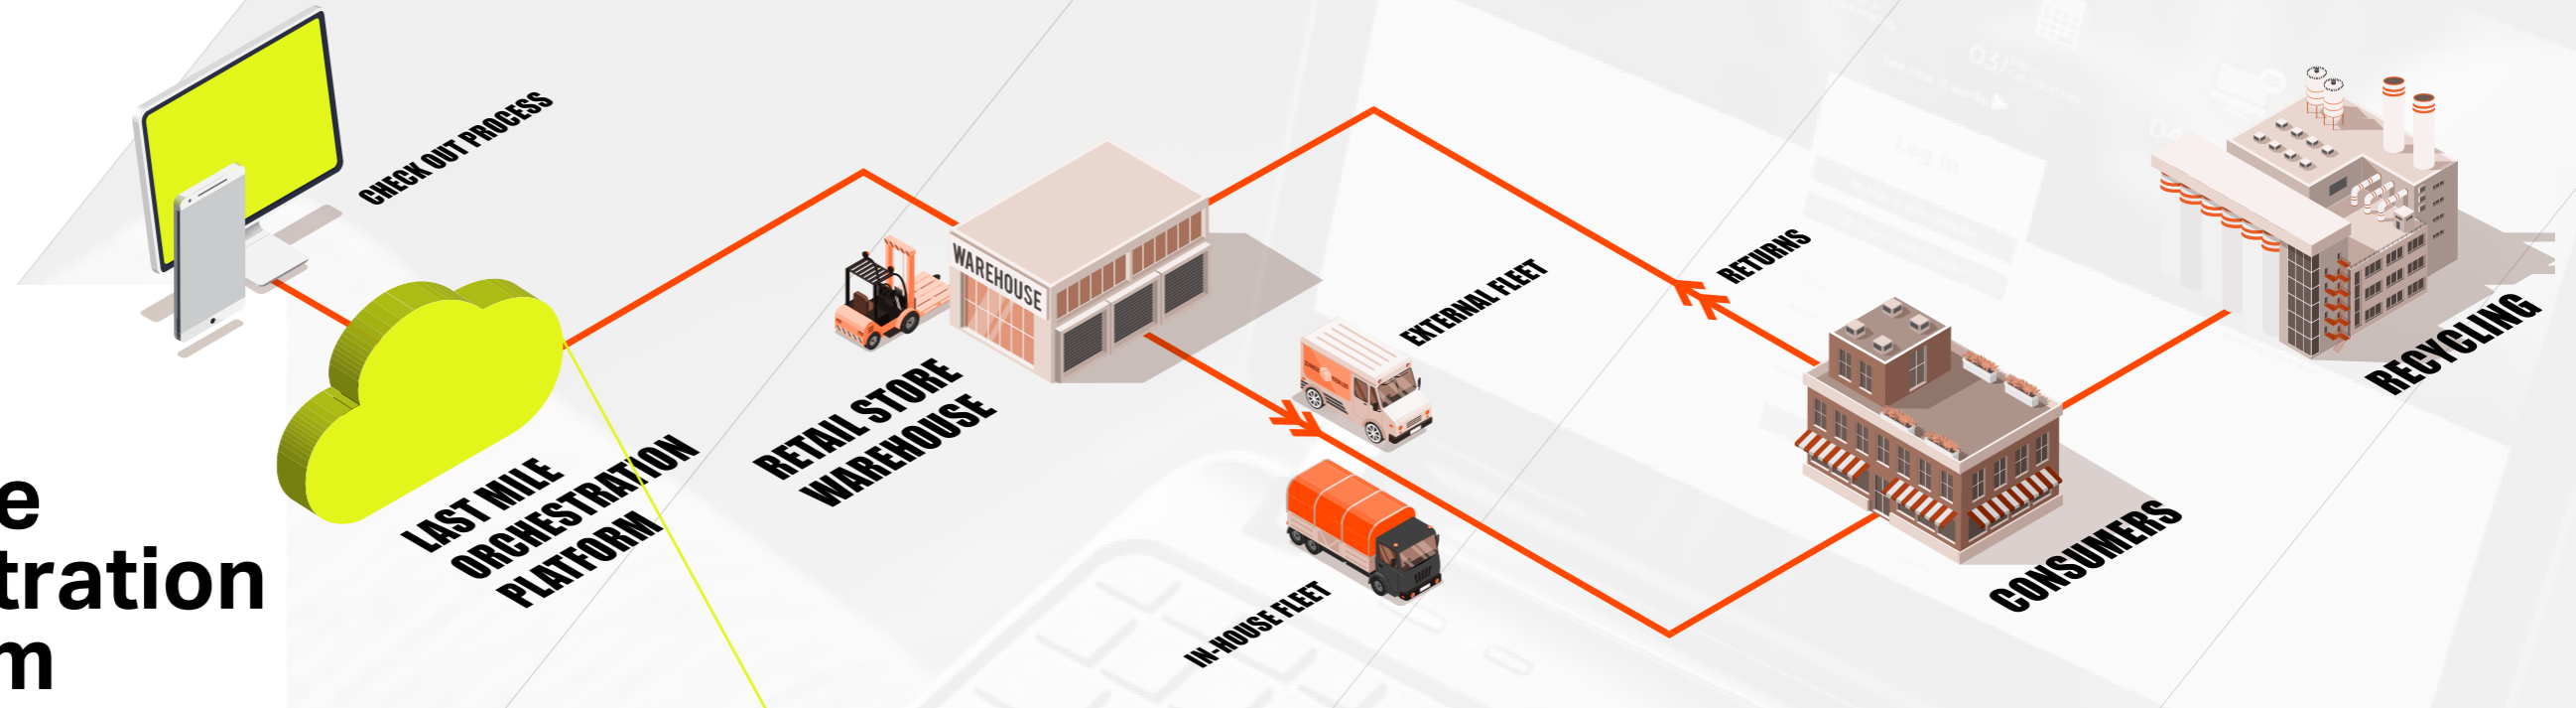

Our online platform through which you can calculate the cost of your international road imports & exports.

# Logika last mile orchestration platform

B2B catching up with B2C standards through our Last Mile Orchestration Platform

Logika's "Last Mile Orchestration Platform" acts as the "vessel" for flexible deliveries, employing dependable live information at all e-shops, with specialized view option for the status of the totality of deliveries, as well as real time reports & analytics

Your customers stay on top of their orders, by utilizing real time updates on delivery status, either bis SMS or email.

- Real time visibility on deliveries with live ETA for Retailers & End Customers
- IOD, POD & history of orders and deliveries
- Reverse Logistics
- Business Information & Analytics
- Readily customizable for bespoke deliveries

# Put Wall Technology

Logika as a technology driven organization invested on a Put-To-Wall system as an order picking system. All the orders that are to be picked are consolidated and processed as a single collective order. These multiple orders combined are processed together & the individual SKUs for those combined orders are picked in the crates and sent to the sortation area.
